
PUZZLING SOLUTIONS FROM PAGE 118

A High Wind on The Ridges
These ten trees make up five straight rows of four trees each:

Ice Cubes and Altitudes
Allowing for some possible evaporation, the water levels should be the same (unless Archimedes has misled us for the past 21 centuries or so).

Triple Duty
O P E R A T O R

At the Livestock Market in Tarbox Corners
7 cows (£70), 72 hens (£9), and 21 pigs (£21).

An In The Hills “One Minute!” Puzzle Challenge
The tree is cut in winter when the lake is frozen.
The answer is 0.
After the multiplier 9, the answer is 362,880, but multiplying by 0 then produces 0.
Pronounced as one letter but written with three, “eye” reads both forward and backward.
She doesn’t shave.
