Switching Cars at Palgrave Station

X heads along the main line to the west siding and backs B into the spur, leaving it there. X returns to the main line, enters the east siding, and pushes A to couple with B at the spur. X pulls both cars fully into the east siding, uncouples from them, and heads to the spur via the main line and west siding. From the spur, X pushes A and B along the east siding until A alone is on the main line, and uncouples the cars. X returns to the main line, couples to A, pulls it westward, and pushes it into the west siding.

The Rungs on Maisie's Ladder
